

MAXIMUM PROFIT. MINIMUM RISK. WHAT A CONCEPT.

VectorVest®. A computerized high profit, safety-oriented, investment tool that gives you clear BUY, SELL and HOLD recommendations - Market Timing recommendations that have never failed! - for any kind of investment situation - long-term investing, short selling, options, value investing, technical analysis, bear market investing, low-priced stocks and more.

WHAT'S VECTORVEST ALL ABOUT?

In 1978, Dr. Bart DiLiddo, Ph.D. began to create mathematical models that clearly define EXACTLY what causes a stock's price to rise or fall. No opinions. No guesswork. He discovered that all the influencing factors could be summed up in mathematical value models, mathematical safety models and mathematical timing models. After testing and retesting, he discovered that the models worked.

Profits were reaped even during the worst recent stock market chaos. This system has been proven over and over again.

The result is MAXIMUM PROFIT with MINIMUM RISK. It's the most powerful online computer database software you could hope to find - Updated daily!

This amazing software is for any kind of individual investor. It's easy to use. Just two or three clicks of your mouse and you've got a world of powerful, objective information at your fingertips.

You get clear BUY signals, but you also get clear SELL or HOLD signals. This is important. Most investment advisers will tell you to buy, but often too late. And they might tell you to sell. Again, often too late.

A BRIEF REVIEW OF HOW OUR MATHEMATICAL MODELS WORK.

VectorVest monitors more than 15,500 stocks each day, calculating two measures of value for each stock in our database. The first measure is the most important. It's called Relative Value (RV). The second measure is called Intrinsic Value.

These measurements compare one stock with another to see if it's undervalued or overvalued compared to other stocks in the database.

It also factors in discounted cash flows, earnings, earnings growth, profitability, inflation and interest rates.

We start with an RV rating of 1.00. Anything above that is worth looking at. Anything below 1.00 is a red flag. Stocks with ratings above 1.00 have above average appreciation potential. If it were below average, you'd be better off in an AA corporate bond. But that's just the beginning.

Next, we want to measure Relative Safety (RS). This measure tells you how stable a stock is compared to other investments. Again, if the stock is above 1.00 it's safer and more predictable than other stocks. If it's risky and unpredictable the rating will be below 1.00.

Then, we measure Relative Timing (RT). How does the short-term price performance look? If its price performance looks good, it gets a rating above 1.00. If it looks risky, it gets a rating below 1.00. If the price trend is flat it just gets a 1.00.

OUR RATINGS GO FROM 0.00 TO 2.00. IT'S THAT SIMPLE.

Example: If a stock's RS rating is 1.54 it is safer than a stock with an RS rating of 0.97.

Using VectorVest you can check every stock for RV, RS and RT with just a few clicks. And more. You can check low-priced stocks. You can check "blue-chips." You can check entire industries and sectors. It only takes about 20 seconds to check a sector or individual stock and rank them to get clear, and powerful BUY, SELL or HOLD signals. It's amazing.

You can also check other parameters. Like P/E ratios, dividend yields, high earnings growth rates and more.

Now, with that very brief overview of how VectorVest works, allow me to show you what kind of results you can get using this unique, powerful system.

THE RESULTS? READ ON.

Remember: As these stocks get BUY signals at the right time and SELL signals at the right time. Our timing system has NEVER FAILED.

For users of VectorVest, profits like this are routine:

- Potash Corp. (POT) - Up 596% in 22 months.
- Axys Tech (AXYS) - Up 245% in 14 months.
- Companhia SdADS (SID) - Up 347% in just 16 months.
- Mechat Opns (MTL) - Up 277% in 9 months.
- Contango Oil & Gas (MCF) - Up 189% in 14 months.
- Rex Energy (REXX) - Up 133% in 6 months.
- Illumina (ILMN) -

Up 133% in only 13 months.

- James River Coal (JRC) - Up 470% in 6 months.

IMPORTANT: If there was ever a time you needed reliable stock market guidance it's now! VectorVest is the only service that combines the power of Fundamental Valuation with the insight of Technical Analysis, and uses a Market Timing System to buy low and sell high. VectorVest's top stocks have made more 89.57% of the time over the last 12 years.

PROVE IT YOURSELF!

Don't invest another dime until you check out VectorVest's profit proven analysis systems. Any one can use our

quickly and easily set VectorVest to screen, rank, sort and analyze stocks according to YOUR investment style.

Can you see why we say this is the most important individual investment tool ever created?

FROM \$100,000 TO \$2.5 MILLION PROFITS!

Using any of these built-in strategies can make you money. But if you use our recommended build-it strategy of the week when we signal a confirmed up in the market and our bearish strategy of the week after we've signaled a confirmed down, you can make a fortune!

If you had done so between 1998 and 2008... you could have sky-rocketed a mere \$100,000 into a whopping \$2.5 MILLION (\$2,500,713) in just ten years. Look at the chart below—

Buying at the bottom, selling at the top—mixed with shorting at the top, covering at the bottom resulted in a **\$2.40 million dollar gain** starting with just \$100,000. It may sound too good to be true, but **our market timing system has never failed to signal a major market move.**

Our "Bear Beater" strategies made incredible money during one of the worst markets in recent memory. Look at these numbers:

Year	S&P 500	Bear Beaters
2000	-10.1	+75.5%
2001	-21.0%	+292.0%
2002	-40.4%	+301.0%
2003	-25.4%	+903.2%

Safe returns and preservation of capital is the name of the game. Timing is the name of the game. Value is the name of the game.

This is no time to consider risky advice based on opinion, hunch and intuition.

VectorVest gives you recommendations based on daily market data and mathematical models that don't lie.

RV, RS AND RT WILL GIVE YOU AN EDGE.

Our timing system has never failed to signal a major move in the market.

Protect your capital... and grow your wealth with clear BUY, SELL or HOLD signals. No second guessing. Check it out for yourself.

Please stop what you're doing and pick up the phone and say YES - I WANT TO CHECK OUT VECTORVEST'S SPECIAL RISK-FREE OFFER!

Call the number below or log onto www.vectorvest.com/ibd. You risk nothing to check it out for yourself. We guarantee it's the smartest, fastest and easiest to use stock analysis system you'll ever find.

WHEN YOU TRY IT HERE'S WHAT WILL HAPPEN.

Options are the overlooked darling of investment vehicles. Options give you better downside protection.

WHAT INVESTORS ARE SAYING ABOUT VECTORVEST.

WELL WORTH THE PRICE

"After VectorVest gave a confirmed down on November 1, 2007, I sold all the stock positions in mine and my wife's accounts. On November 6, 2007, I purchased 1000 shares each of three different UltraShort Proshares. I closed the last position on November 26, 2007 for a combined profit of \$28,424.62 including commissions. Thanks again."

—P. M., Midland, TX

I HAVE MADE \$3.5 MILLION SHORTING STOCKS

"I have made \$3.5 million shorting stocks; most were chosen on VectorVest. I followed your advice and it paid off. I have done considerably better than my friends and associates."

—D.J.M., Detroit Lakes, MN

I MADE 50% IN THE FIRST 2 MONTHS

"I've only had VectorVest 2 months, but it has already improved my profit by 50%. I bought call options on one of the first stocks VectorVest helped me pick and they are now up 300% in 2 months. I am very impressed with every aspect of VectorVest. I have had to change the way I do things a little, but it has all been for the better. I have better picks and spend less time doing it."

—G.K., Hayward, CA

IT'S ABSOLUTELY THE BEST

"I've tried nearly every software program in the business. AIQ, Telecan, Super Charts, you name it. VectorVest Online is absolutely the best. I don't use or need anything else."

—E.J.C., Naples, FL

THIS IS THE GREATEST TOOL

"This is the greatest tool that I have had the pleasure of using in my 30 years of trading experience! I was not lucky enough to have VectorVest in place before the July 27th meltdown. I follow a few "gurus", but not a hint from any of them. I quickly lost 10% of my portfolio. Since starting with VectorVest, as of 9-24-07 I was fully recovered and now up 6% from that point."

—R.K., Fern Park, FL

They give you stocks at discounted prices. And using VectorVest, you can make greater profits no matter if the market is bullish or bearish. This report will show you different options strategies and how to confidently implement them to see your profits explode off the charts.

TEST DRIVE VECTORVEST. 5 WEEKS FOR ONLY \$9.95.

All we ask is a small \$9.95 token fee for all this. If you like it we'll have won you as a customer. If you don't like it, just let us know within 30 days and we'll refund your money and you get to KEEP THE FREE BONUSES as our way of saying "Thank you, for giving us a try."

We've built our business by giving investors more than they have any right to expect, an investment tool they could only dream about before. Value, Safety and Timing! And we make sure our subscription fee IS the best investment you'll ever make. For less than a cappuccino and a fancy pastry, you can try an investment tool that has signaled EVERY major market move for over a decade - with clear BUY-SELL-HOLD recommendations.

It gives you incredible profits and safety. It gives you sufficient time to take your profits and protect your capital. As a subscriber you can check the recommendations daily, weekly or use one of our long-term strategies and make your decisions monthly. Either way, this will give you an almost "unfair" advantage over other investors. And THANK YOU in advance, for giving us the opportunity to serve you.

One more thing, VectorVest is very easy to use. If you have any questions about how to use the program, you can call us toll free, visit the VectorVest University to view free online training videos, use the online guide or watch the CD we send you. It's that easy.

VectorVest is a real bargain, just \$59 per month, but you can try it risk-free for five weeks, only \$9.95.
